Banner 43 A

BANNER 43 A is a very unusual product in that it is both a very heavy duty cleaner for steel and a very effective agent to remove rust from steel surfaces. It is a highly alkaline, highly caustic material that will remove rust when only an alkaline media can be tolerated and an acid pickle is contraindicated.

BANNER 43 A is supplied as a dry powder and is used in the concentration of 8 to 16 ounces per gallon of hot water (165-185 F). Immerse parts for a few minutes or for several hours depending upon the severity of the rust. This should be followed by a thorough water rinse. Mild steel tanks can be used and caution in handling this material should be exhibited because of the high degree of alkalinity. It is suggested that goggles or face shield, rubber gloves and aprons be used. Adequate ventilation is also suggested.

WARRANTY

THE QUALITY OF THIS PRODUCT IS GUARANTEED ON SHIPMENT FROM OUR PLANT. IF THE USE RECOMMENDATIONS ARE FOLLOWED, DESIRED RESULTS WILL BE OBTAINED. SINCE THE USE OF OUR PRODUCTS IS BEYOND OUR CONTROL, NO GUARANTEE EXPRESSED OR IMPLIED IS MADE AS TO THE EFFECTS OF SUCH USE, OR THE RESULTS TO BE OBTAINED.
